Field strength meter for the HDTV era

wbLNB COMPATIBLE

Spectrum analyser from 5 to 2500 MHz
Satellite band from 250 to 2350 MHz

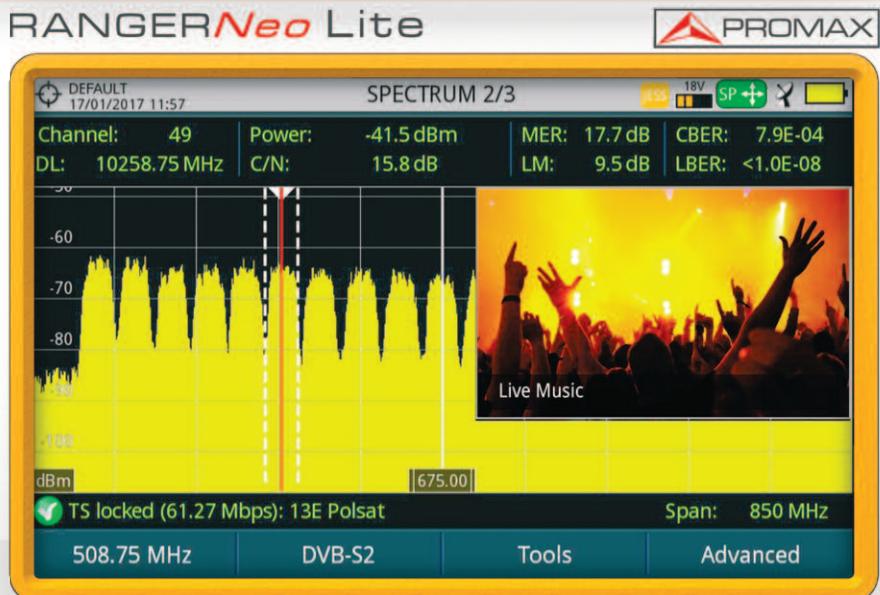

Wideband LNBS deliver the entire Vertical and Horizontal satellite polarities (low and high band together) using two separate RF cables and an extended IF frequency range from 290 to 2,340 MHz. **Is your analyser prepared?**

DCSS LNBS

Digital Channel Stacking Switch satellite LNB

Digital Channel Stacking Switch LNB can support several users on a single cable distribution system by allocating specific user bands for each of them. It is not possible to work with this type of LNB unless your field strength meter can communicate using EN50494 and EN50607 standard protocols.

This is the case of **RANGER *Neo* Lite** which also covers JESS and SATCR.

Simultaneous real spectrum analyser information + WiFi access point data

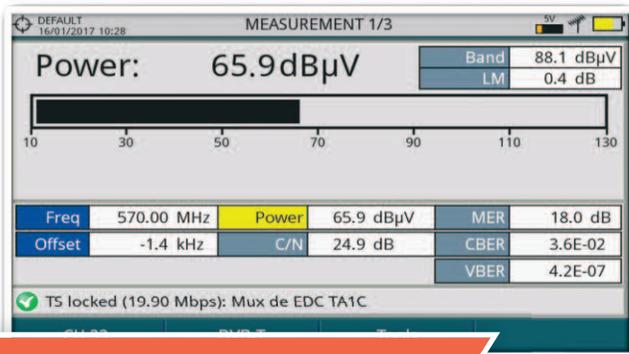

WiFi signals can be disturbed by interference from other WiFi stations, for example other access points, but also from non-WiFi signals such as wireless CCTV cameras or, like in the picture, a microwave oven! **RANGER Neo Lite** can display both simultaneously.

RANGER Neo Lite shows convenient information from the access points such as SSID, RSSI, SNR, security information, etc. It also indicates the number of access points per channel.

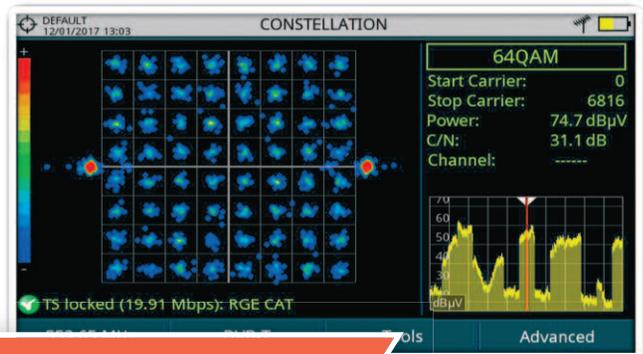

Enjoy a wide variety of functions

MANY USEFUL FUNCTIONS

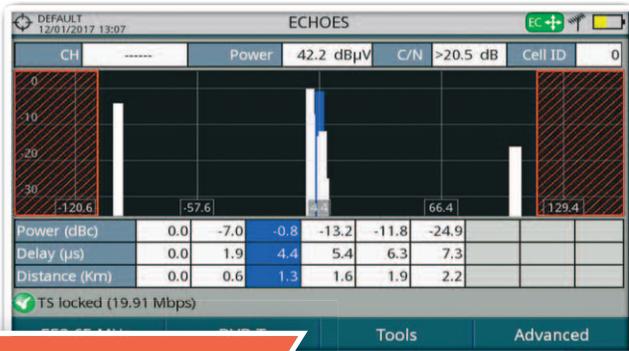

Simultaneous measurements

More computing power for real-time measurements displayed on a single screen.

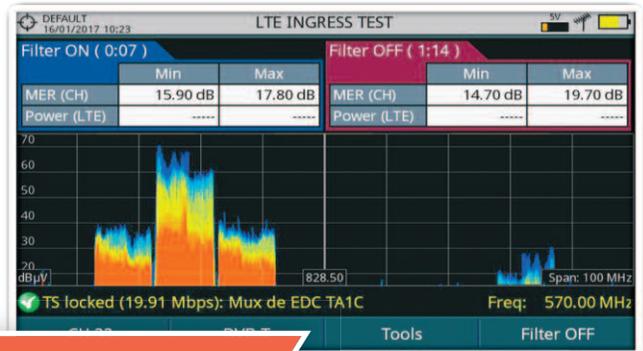

Constellation diagram

Detect signal impairments at a glance. The more disperse the points are, the worse.

Dynamic echoes

A must-have utility for testing DVB-T, DVB-T2 and DVB-C2 networks.

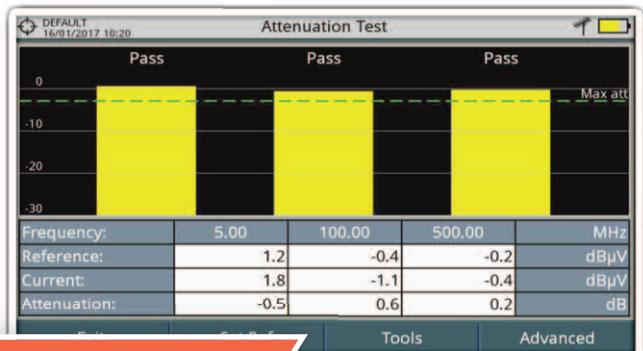

LTE ingress test

Should you install an LTE filter? Test your TV distribution system.

Datalogger and Test&Go

Collect data for your reports faster and easier using the auto-setup Test&Go.

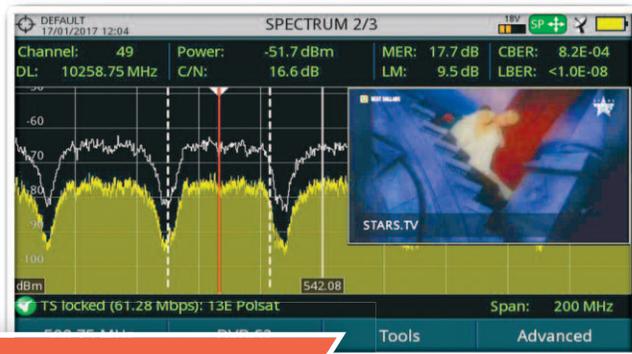

Attenuation test

Test the frequency response of your installation using RP-050, RP-080, RP-110B signal generators.

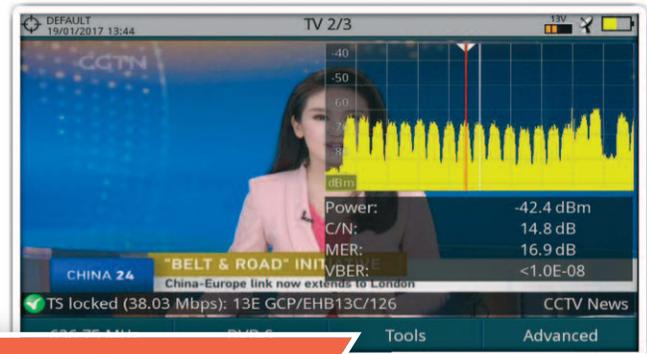

Fast and accurate spectrum analyser

PROFESSIONAL SPECTRUM ANALYSER

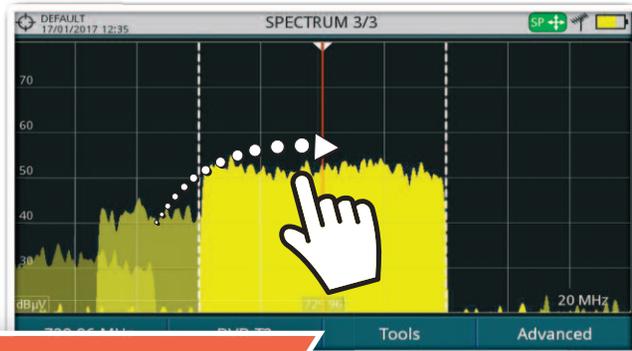

Reference traces

Freeze the spectrum graph and compare it with the running trace.

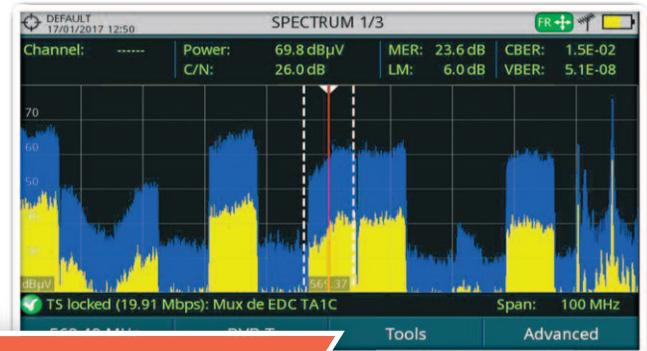

Triple split display

Say goodbye to switching between TV, measurements and spectrum modes.

Touch screen

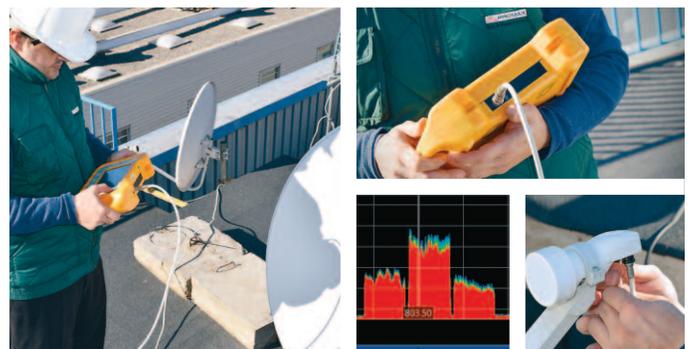

Place the marker on any channel and move the trace using your finger.

MIN and MAX hold

Display them separately or simultaneously along with the current spectrum trace.
