SIGNO

... authentic sound and sophisticated design:

It was with the demanding requirements that many enthusiasts have in terms of unadulterated, authentic hi-fi stereo or surround sound in mind that quadral developed the new SIGNO series of loudspeakers. And, besides aural quality, visual appearance was a key priority. The result: ultra-slender cabinets featuring sophisticated design that optimally complements the elegance of modern plasma and LCD screens. The difficult task of fitting perfect sounding chassis into such a flat-form aluminium housing with a depth of just 65 mm is one that quadral's engineers solved in a masterly fashion, and the resultant sound is more than a match for that of far more voluminous units.

Visual diversity was a feature to which particular importance was attached, and the highly attractive rounded columns are available in a variety of real-wood colours or lacquer finishes. This means that SIGNO loudspeakers can be optimally matched to virtually any home environment. The elegant glass base of the SIGNO 200 or SIGNO 200 BASE can be removed for wall-mounting of these units, for which we recommend the MOUNT 200 wall mount that comes as a standard feature with the SIGNO 200 BASE or is available as an optional extra for the SIGNO 200 as front or rear loudspeaker.

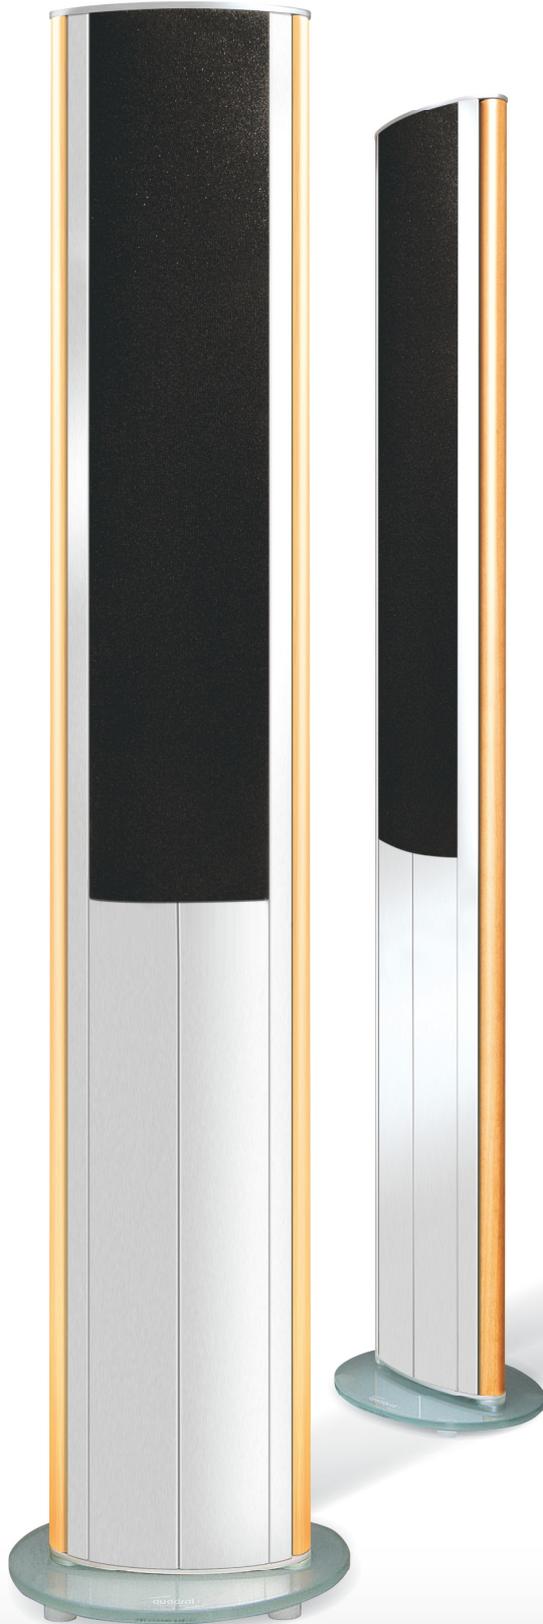

... Hi-fi stereo or surround sound

Two SIGNO 400 or SIGNO 200 loudspeakers form a stereo ensemble that requires little space for installation while delivering an impressive, room-filling sound that is all the more incredible in view of the cabinets ultra-slender design, as well as being highly pleasing in visual terms. For enhanced bass response you can add a subwoofer which can be placed virtually anywhere – and thus unobtrusively – in the room.

Just four SIGNO 200 units plus the SIGNO BASE 200 are all you need to form the fundament for a superb five-channel surround sound system, and by combining SIGNO 400 and SIGNO 200 units you can put together a system that meets your own individual requirements right through to 7.1 surround sound. By virtue of their concept the loudspeakers in the SIGNO series are at their very best when working together with a subwoofer for enhanced bass response, for which purpose we recommend one of quadral's active subwoofer.

SIGNO shows you what the future of home cinema looks and sounds like.
